# EPDM Trim Installation Guides

## Fitting a gutter edge drip plate

In this guide, we will demonstrate the installation process for the Permaroof trim product - the gutter edge drip plate.

See how our professional EPDM flat roof trainer installs the trim drip plate in just four simple-to-follow steps. The drip plate forms a vital part of the EPDM waterproofing system at the gutter edge.

**Shop online for your Permaroof trim at:**

[permaroofstore.co.uk/trims](https://permaroofstore.co.uk/trims)

## How to install the gutter edge drip plate

### Step 1

Make a mark around the edge of the roof, right where it falls over the sides.

In this example, there are curved edges on the other two dimensions. Trim all edges down to 50mm.

## Step 2

The drip plate is placed in position over the edge of the roof.

This traps the EPDM membrane between the back plate and the drip plate and creates a watertight seal.

**Find out how to install the back plate in the Permaroof resource library at:**

[permaroof.co.uk/resource-library](http://permaroof.co.uk/resource-library)

## Step 3

The drip plate will secure on to a hook on the back plate and it will snap into place.

This secures this edge completely.

## Step 4

Tap the entire length into place.

And you're done.
